DETAILED ACTION

Drawings

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Specification

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.

Application/Control Number: 10/565,695 Page 3

Art Unit: 3749

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (1) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).
- 3. The disclosure is objected to because of the following informalities: a drawing is required to facilitate the understanding of the invention. Applicants should arrange the specification using above preferred layout.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Dinh (U. S. Pat. 5,343,632).

Dinh shows a method for operating an appliance 230 comprising subjecting the items 244 retained in the appliance 230 to a drying step, conducting air (by fan 238) from a treatment chamber 234 via a conduit system 250 in which both ends of at least one heat pipe 252 protrude, conducting the air through the at least one heat pipe 252, recirculating the air back to the treatment chamber 234, during the passage of the air between its exit 248 of the treatment chamber and its recirculation to the treatment chamber 234, the air is cooled by condenser 260,

Application/Control Number: 10/565,695

Art Unit: 3749

moisture is removed from the air (via drain 258) and the air is subsequently reheated by heater 242 (see abstract and col. 7, line 18 to col. 8, line 28).

6. Claims 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto et al. (JP 53-36067).

Okamoto et al. show a method for operating an appliance (see Fig. 1) comprising subjecting the items A retained in the appliance to a drying step, conducting air (by fan 8) from a treatment chamber 1 via a conduit system 6, 7, 12, 11, 14 in which both ends of at least one heat pipe 19 protrude, conducting the air through the at least one heat pipe 19, recirculating the air back to the treatment chamber 1, during the passage of the air between its exit 5 of the treatment chamber 1 and its recirculation to the treatment chamber 1, the air is cooled by condenser 23, moisture is removed from the air (via drain 36) and the air is subsequently reheated by heater 14 (see abstract and Figs. 1-3).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jiping Lu whose telephone number is 571 272 4878. The examiner can normally be reached on Monday-Friday, 9:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, COCKS JOSIAH can be reached on 571 272-4874. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
